

Erasmus+

Co-build a skills repository

Jean-Marie de Ketele

CV

*Professor at the University of Louvain and the UNESCO
Chair in Education Sciences
Lecturer at the ICP (Catholic Institute of Paris)
Doctor Honoris Causa of the CUSE (Dakar) and the ICP (Paris)*

REPORT OF THE INTERVENTION

***A reference system of skills : for what ? With reference to what ?
A repository is used to guide the action of a collective, build a business repository,
build a curriculum (teaching, training ...), certify skills (framework : academic ?
Professional environment ? ...), regulate an action personal, define the priority
skills to develop in a step $t + 1$, self-position (explain the skills developed : see
ANGE).***

***With reference to what ? (what values?)
It must be effective, relevant, appropriate, refer to an educational vision and be
constructed with reference to this educational vision co-constructed by the actors.***

***J. M. de Ketele shows in his conference how to co-build a common language,
proposes a model for developing the skills reference by alternating co-working
workshops and expert summaries.***
